3 Deck Oven

2 Deck Oven*

2 Deck Brick Oven

4 Deck Oven

Features that take the Veroformo beyond "just a pizza oven"

- Night damper to shut off the chimney overnight, to minimize initial warm-up time = extra savings.
- Front mounted electric control panel for easy access
- Digital thermostat for automatic temperature control
- Inner halogen lamps on each deck, to provide easy viewing of baking product without opening the door
- Interior wall well compacted with 12 inch top quality insulation, to retain its heat and avoid radical change in oven temperatures & keep a healthy work environment. (Creating less use for Air conditioner during the summer.)
- Unique designed brick combustion chamber, designed to save gas usage.
- The concept of **Veroformo** was to evenly distribute heat into the baking chamber for instant recovery & matchless performance.
- Light weight Aluminum doors ideal for easy opening, doors open towards the inside to stop heat from flowing out. Easy to unload & load to create a less stressful workday.
- Options Bake directly on: stone, tray, pan or screen, with the outcome always the same.
- Fuel consumption; this is the most economical oven on the market today
- MVF 3- Deck oven can bake fifteen 16" pies, or twelve 18" pies within 6 minutes. The required floor space is only 63 x 72", 70" high. Direct or indirect venting.
- The **Veroformo** is very versatile to work with the mini window helps you keep an eye on products being baked.
- Can bake different types of products including: bread, pizza, roast beef, and pasta dishes.
- It is equipped with compelling lights, giving you a perfect view of the products baked.
- Flawless stainless steel for easy cleaning and maintenance.
- The **Veroformo** underwent research and close examination of quality materials, to ensure that it will be durable, firm, safe, and dependable.
- We guarantee quality, uniformity, and consistency every time.

*The Veroformo two deck is also available in Electric
